

Bonjour[®],

The [®]R Space lamp

Art and Design

Nothing is more inspiring than a blank sheet of paper.

A line appears, it takes shape, which is then filled with life and turns it into an Art.
A vision becomes tangible - real, space, lightness, which turns it into a design.

Fascination. The brand new Gingko **R Space Lamp** comes into being, **a design, but also an art...**

Satisfaction and expectation

Discover design that asks the questions of tomorrow and provides the most impressive answers today.

Experience elegance and simplicity that balances captivating presence with the utmost discretion and enjoy the satisfaction of expectations **not just when it's being closed, but also when it's being opened.**

The R Space Lamp - it's **a satisfaction that meets your expectation.**

Aesthetics and Perfection

The R Space Lamp is a perfection through its **most contemporary form**. The R-shaped body simply looks like **a 3D R** when it's closed; But when it opens, it transforms itself into an **elegant and stunning lamp** emitting a delightful soft warm/cool white LED light through this **water and tear proof** 'lantern' made of tyvek papers.

Playful in perfection and inspiration.

Innovative and Ergonomic

As a part of the **intelligent and ergonomic design**, the remote control system has been applied to the R Space Lamp.

The handy supplied remote control can control one single R Space lamp or multiple units at the same time, which has **erased the difficulties and hassles** of trying to turn on or turn off the R Space lamp at the other side of your bedside table. However, it also works independently, so it won't cause any conflict when turning off the others when you have more than one unit in your room.

Being simple in style.

Rechargeable and Dimmable

R Space lamp **saves your space.**

You can just lean back on your chair or bed and relax in a comfortable and cozy ambient light environment emitting from this **space-saving object.**

Powered by a **2500mAh integrated rechargeable long-life battery** (USB charging cable included) or a DC5V USB plug adapter, the R Space Lamp is **fully portable** so you can take it anywhere with you, or you can just permanently have it plugged in. Plus, with its **fully dimmable** feature (5 levels of brightness setting), you can just close your eyes and relax in a soft and romantic light environment or you can change it to the brightest mode to read a book by and discover your own land through the books.

R Space is your space ...

Cool and Cozy

The R Space Lamp looks cool as a cool spaceship when it's opened, but it also creates either a 'cool' white or soft warm cozy light.

You can simply **switch the light colour in between cool white and soft yellow white light** by using the handy remote control, or you can just comfortably do the **opens-and-shuts**: 1st time open, it's a cool white light; shut it and 2nd time open, it's then a soft warm yellow light.

It's cool, fun and cozy...

Details and Quality

Quality is a matter of details and we made every single detail in this product with our best quality standard.

The perfect laser cut edges and fine engraved mark makes the whole product have a very **smooth touch feeling** and the **extra long-life LEDs** enables the product to light up to a **minimum 45,000 hours** in total.

Making fine details on this product is our job but discovering the high quality is your experience.
