

# Product User Manual

## **What are included in this product ?**

One booklight, a guidance manual and a USB charging lead.

## **How to use this product?**

Just open it as a normal book and it will light up instantly with a very smart white light. Close the book and the light will automatically turn off. (The Walnut book light lights up with warm Soft light, and the maple one lights up with cool white light )

## **Can it be opened at any degree?**

Yes, it can be opened at any degree up to 360 degrees and both covers are magnetic in the middle, so the two covers can be attached together while it's opened in 360 degrees.

## **How to charge this product?**

Just connect the USB lead to your USB phone charge or any USB charger as long as the output is not more than 5V, and then connect the other micro end to the charging point at the left bottom side of the booklight while it's opened. While in charging, the charging indication light will be in orange and when it's fully charged, it will turn into Green.

### **Is the paper waterproof?**

Yes, it's waterproof but we don't recommend you to get any water on the electrical parts under/inside the paper.

### **Is there any special care instruction to this product?**

No, there isn't any special care needed to this product apart from making sure you will charge the product via the right charger . You can charge it via your computer USB ports or any USB phone charger.

### **What's the warranty of this product?**

It comes with one year warranty as long as it's a standard product fault and not an intentional damage.
